Bleached Card / Paperboard (SBS)

SBS is a premium-grade paperboard made from virgin wood pulp and fully bleached for a clean, white appearance. It offers excellent printability, a smooth surface, and is ideal for sharp graphics and vibrant colors. SBS is also FDA-compliant for direct food contact, making it suitable for both dry and refrigerated environments.

Key Characteristics:

- Smooth, bright white surface
- Superior print quality
- Lightweight yet rigid
- FDA-approved for food contact
- Recyclable and eco-friendly options available

Best Fit For:

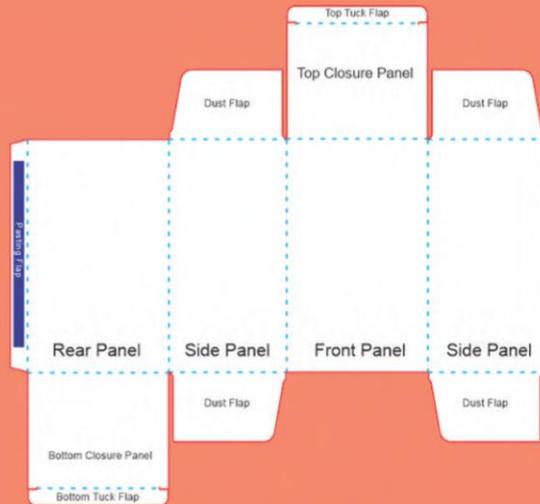

- Cosmetic boxes
- Pharmaceutical packaging
- Frozen food packaging
- CBD Packaging
- Fast Food Packaging
- Bakery Box Packaging
- Retail Boxes

Kraft Stock

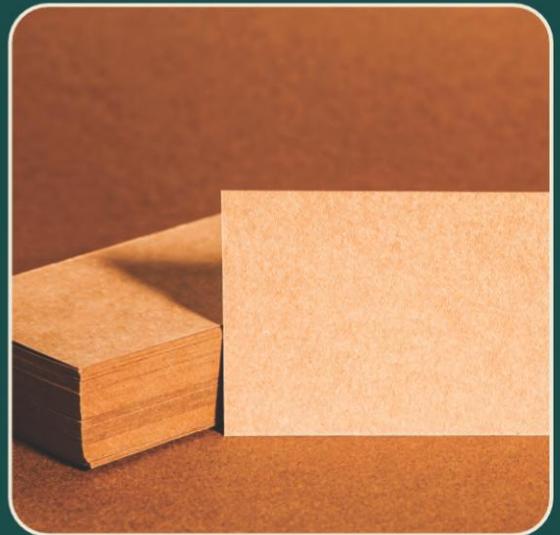

Kraft stock is a durable and eco-conscious paperboard made from unbleached wood pulp, giving it a natural brown appearance. Known for its strength and rustic aesthetic, Kraft is ideal for brands aiming for a sustainable, organic, or minimalist look.

Key Characteristics:

- Natural brown, earthy texture
- High tear resistance and strength
- 100% recyclable and biodegradable
- Cost-effective and environmentally friendly
- Limited print vibrancy due to darker base color

Best Fit For:

- Eco-friendly product packaging
- Organic skincare
- Handmade goods (Like Candles)
- Food takeout boxes
- Sustainable e-commerce brands

Corrugated Stock

Corrugated stock is a sturdy, multi-layered material made of a fluted inner layer sandwiched between two flat linerboards. It's known for its strength, cushioning, and resistance to crushing, making it ideal for shipping and heavy-duty packaging. Available in various flute grades (E, B, C, etc.), it offers flexibility in thickness, protection, and printability.

Key Characteristics:

- Excellent durability and structural strength
- Shock and impact resistant
- Ideal for transit and stacking
- Printable outer layer for branding
- Recyclable and sustainable options available

Best Fit For:

- Shipping boxes
- Subscription packaging
- Products Packaging
- Glass bottles
- Industrial parts
- E-Commerce mailers

Rigid Stock

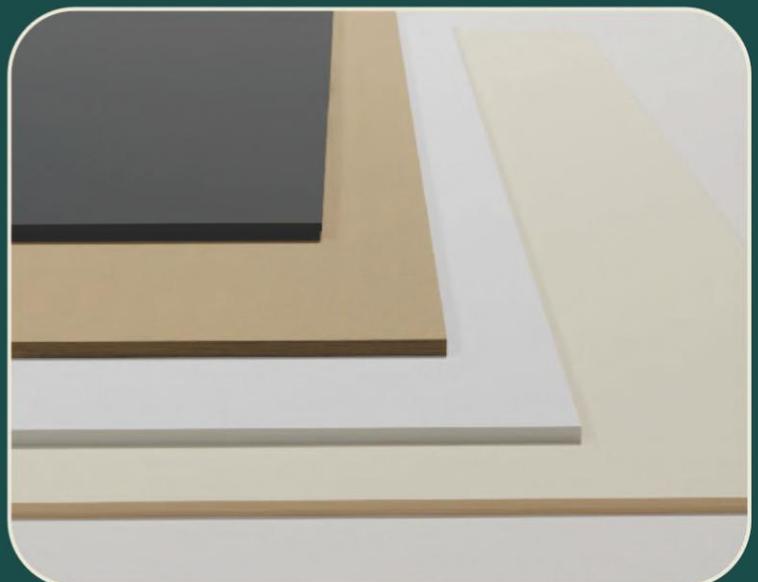

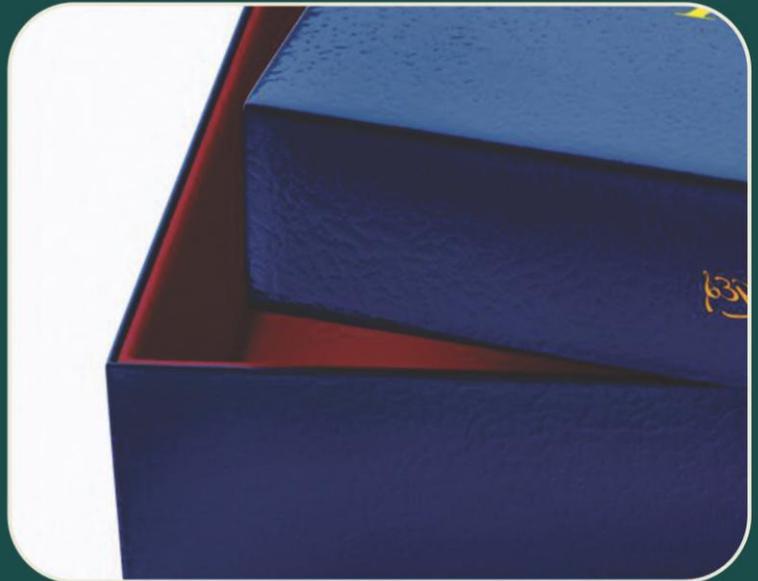

Rigid stock is a thick, durable and sturdy material that provides a premium, luxurious feel. It's made by compressing layers of recycled paperboard, often wrapped with printed or textured paper for a high-end finish. Due to its superior strength and presentation quality, rigid packaging is commonly used for upscale or gift-worthy products.

Key Characteristics:

- Extremely sturdy & durable
- Mostly non-collapsible
- Luxurious look and feel
- Customizable with embossing, foiling, and inserts

Best Fit For:

- Luxury product boxes
- Perfume and cosmetic gift sets,
- Jewelry
- Promotional kits

Mylar Bags

Mylar bags are made from multiple layers of polyester film (typically PET) that are laminated for durability, moisture resistance, and light blocking. Known for their excellent barrier properties, Mylar bags preserve freshness, prevent contamination, and extend shelf life, especially for sensitive or perishable items. They are often heat-sealable and available with resealable zippers.

Key Characteristics:

- Exceptional moisture, oxygen, and UV barrier
- Lightweight yet puncture-resistant
- Heat-sealable and resealable options
- Available in clear, opaque, or metallic finishes
- Ideal for extended storage

Best Fit For:

- Food products (snacks, coffee, herbs),
- Pharmaceuticals
- Supplements
- Cannabis packaging
- CBD Packaging

Stickers

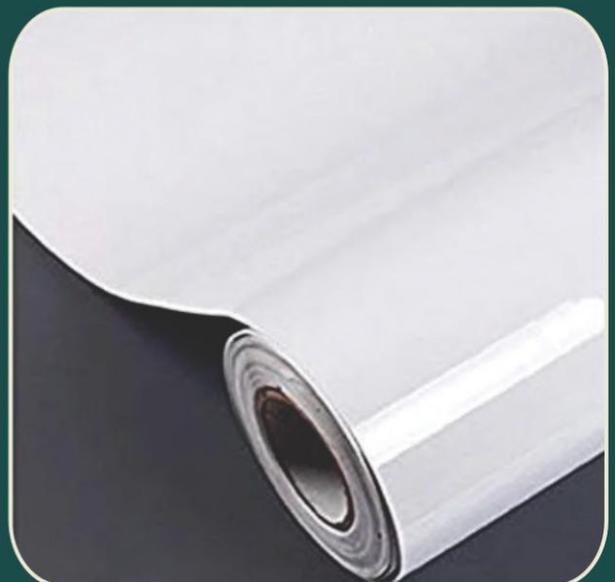

Stickers are versatile branding tools used to label, seal, or decorate packaging. They are typically made from paper or vinyl with adhesive backing and can be printed in a variety of finishes gloss, or holographic. Stickers not only enhance brand recognition but also offer practical functionality for tamper-proofing and information labeling.

Key Characteristics:

- Available in paper or waterproof vinyl
- Adhesive backing
- Fully customizable in shape, size, and finish
- Can be die-cut, foil-stamped, or embossed
- Enhances branding and adds a professional touch

Best Fit For:

- Product labels
- Logo stickers for boxes/jars
- Promotional packaging

Paper Bags

Paper bags are a lightweight, eco-friendly packaging solution made from kraft or bleached paper. They come in various styles – flat, gusseted, with or without handles – and are fully customizable with prints, foiling, or embossing. Often chosen for their recyclability and biodegradable nature, paper bags are great for brands focused on sustainability and retail presentation.

Key Characteristics:

- Lightweight and recyclable
- Available in kraft (brown) or bleached (white)
- Easily customizable with branding
- Cost-effective and biodegradable
- Not suitable for heavy or moisture-sensitive items without reinforcement

Best Fit For:

- Retail stores
- Cafes
- Product packaging
- Bakeries
- Apparel brands

Wax Papers

Wax paper is a moisture-resistant, food-safe paper coated with a thin layer of wax on one or both sides. It's commonly used for wrapping food items or lining packaging to prevent grease and moisture transfer. With custom printing options available, wax paper serves both functional and branding purposes in food and retail packaging.

Key Characteristics:

- Greaseproof and moisture-resistant
- Food-safe and FDA-compliant
- Lightweight and flexible
- Customizable with logos and prints
- Compostable and recyclable

Best Fit For:

- Bakeries
- Delis
- Fast food
- Confectionery
- Cheese packaging
- Branded Food wraps

Additionally, we offer Tissue Papers (White/Kraft) for apparels.
